# 🏴 Flag 3 – Install VS Code & Flutter Extension

**Objective:** Install VS Code and the Flutter (which also installs Dart) extension.

**Screenshot:**

- Flutter extension installed
- Dart extension installed (or shown as installed)
-

# 🏴 Flag 4 – Run Flutter Doctor

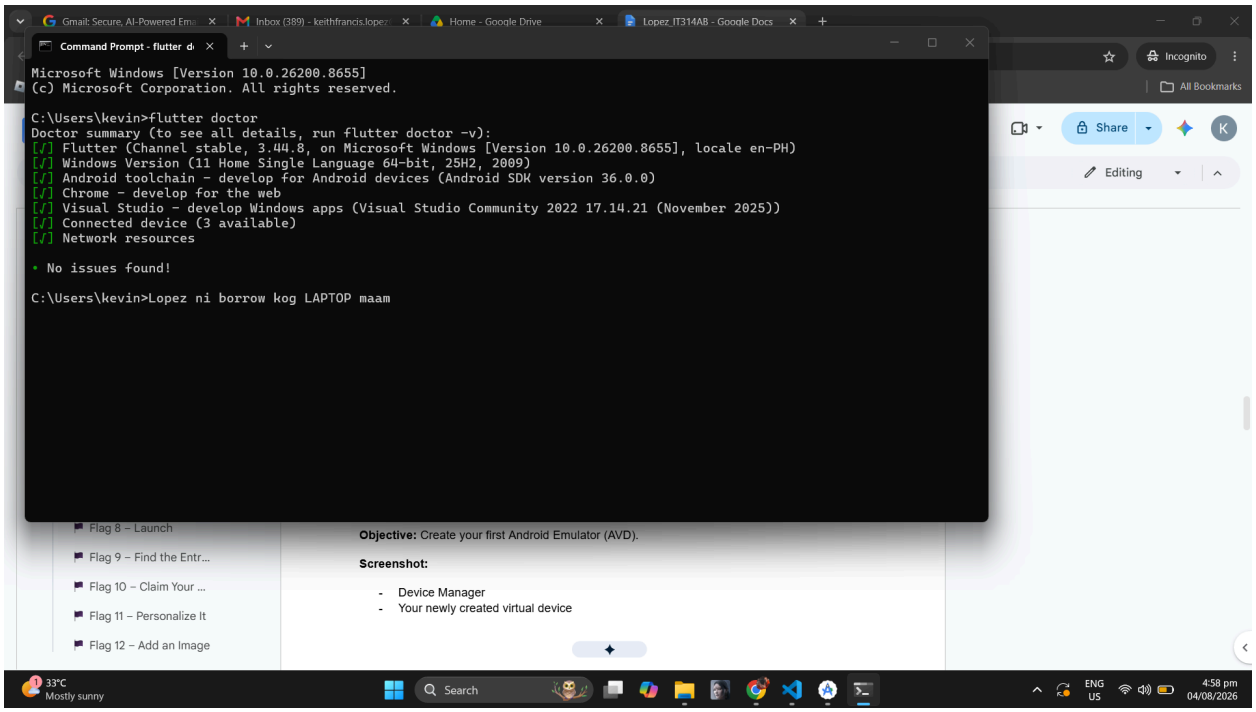

**Objective:** Check whether everything is configured correctly.

Run:

flutter doctor

**Screenshot:**

- flutter doctor results

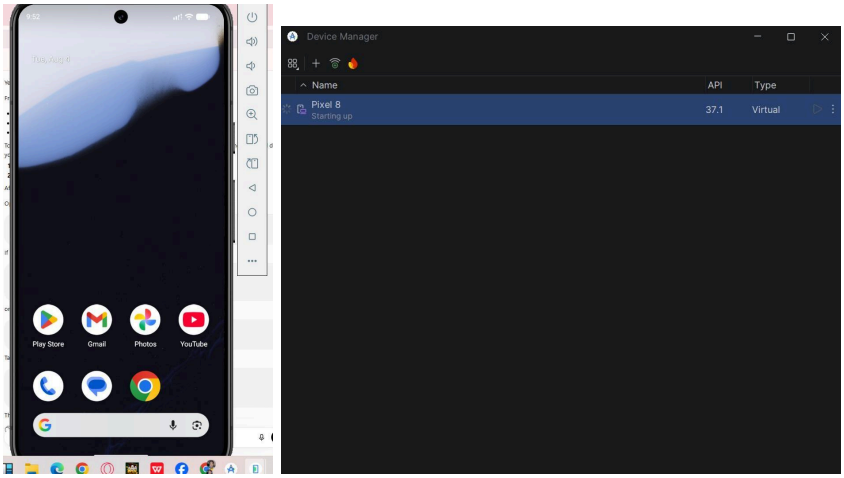

# 🏴 Flag 5 – Build Your Virtual Device

**Objective:** Create your first Android Emulator (AVD).

**Screenshot:**

- Device Manager
- Your newly created virtual device
- Emulator successfully booted

# 🏴 Flag 6 – Forge Your Project

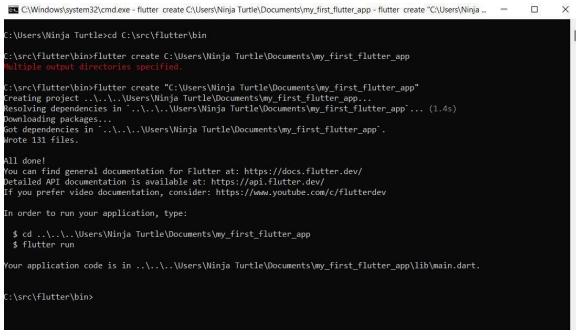

**Objective:** Create your first Flutter project.

Run:

flutter create my_first_flutter_app

Screenshot:

- Successful creation of project

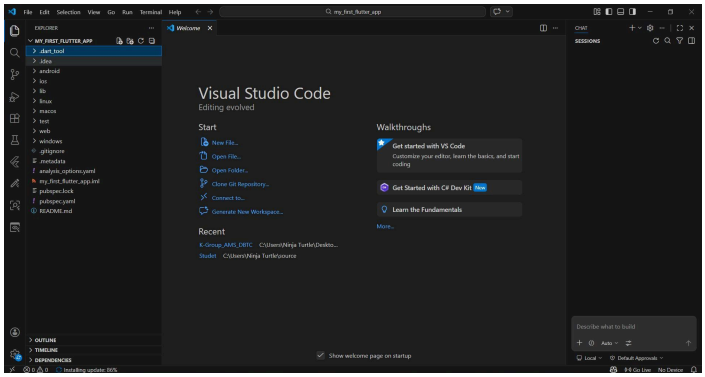

# 🏴 Flag 7 – Unlock the Workspace

**Objective:** Open the project in VS Code.

Screenshot:

- Your project opened in VS Code

# 🏴 Flag 8 – Launch

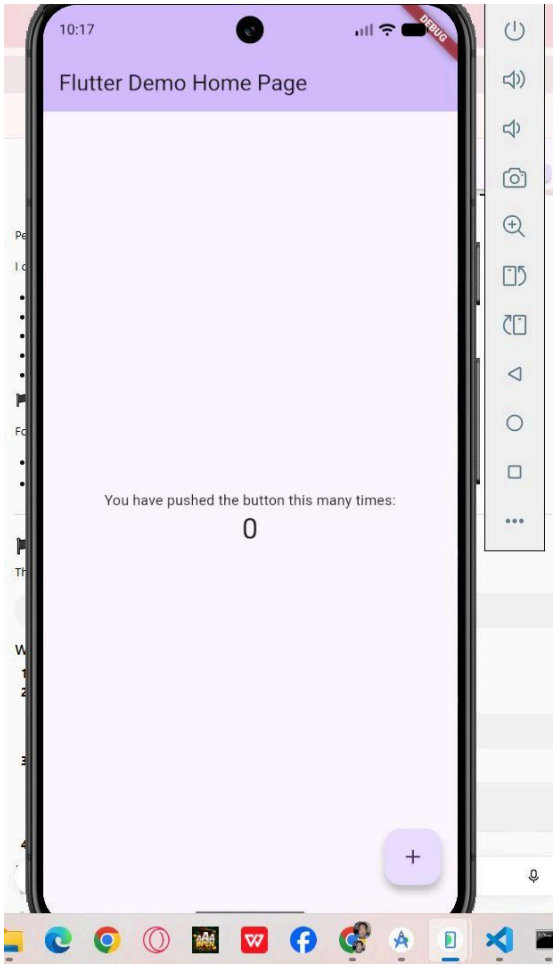

**Objective:** Run your Flutter application.

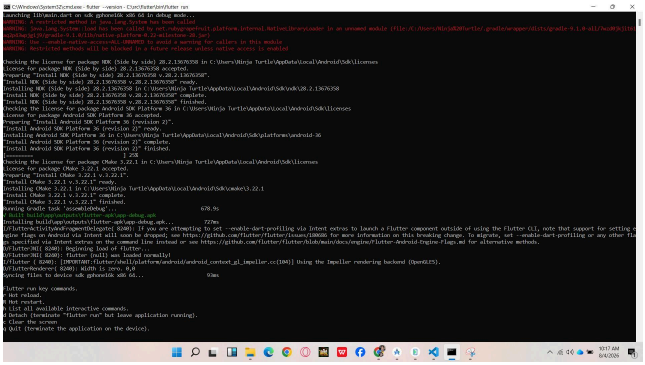

Run:

flutter run

**Screenshot:**

- Terminal
- Emulator running
- Default Flutter app

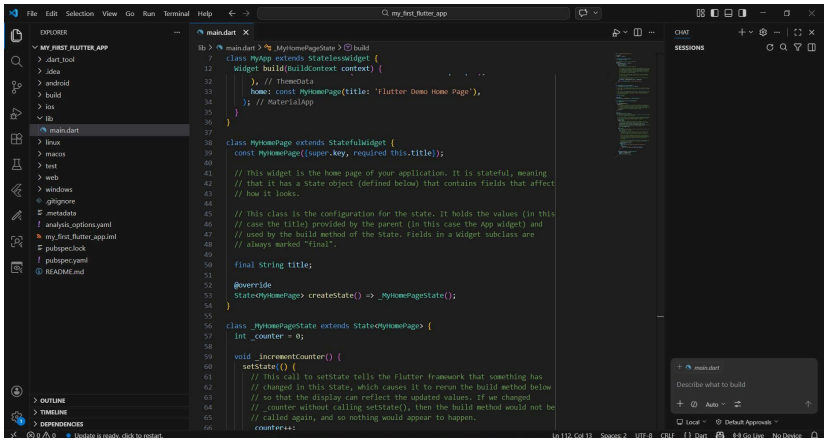

# 🏴 Flag 9 – Find the Entry Point

Figure out where the default Flutter page comes from.

**Screenshot:**

- The location of the file where the default page is from (the one showing on the emulator)

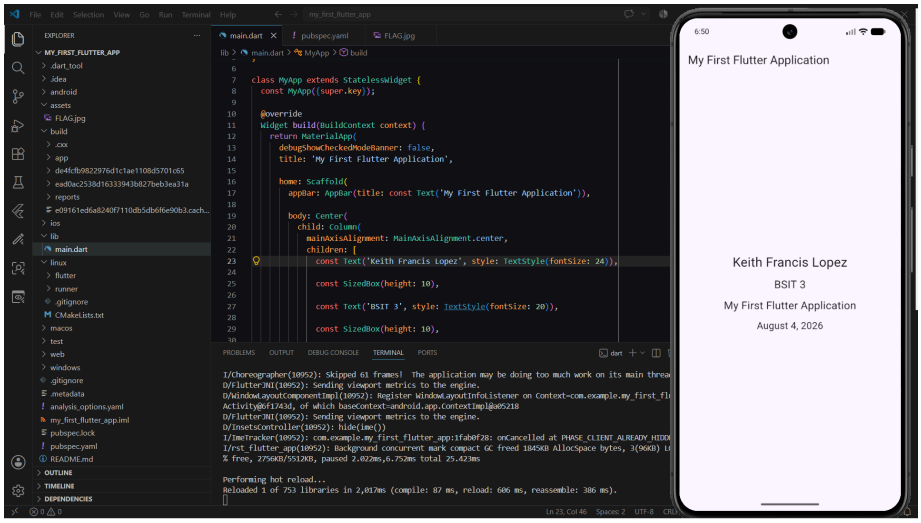

# 🏴 Flag 10 – Claim Your App

Replace the default screen with:

- Full Name
- Course & Section
- "My First Flutter Application"
- Today's Date

Screenshot:

- Your updated content of the code
- The updated UI

# 🏴 Flag 11 – Personalize It

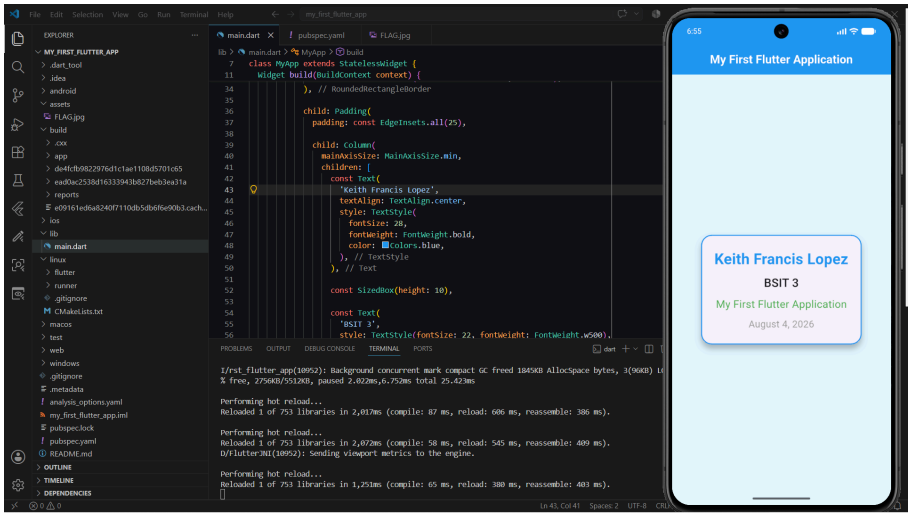

Research and implement at least **three** visual changes.

Examples:

- Change the background colour.
- Change the text colour.
- Centre the content.
- Increase font size.
- Add a border or rounded card.
- Change the font.
- Add an emoji or icon.

Screenshot:

- The code changed for personalizing
- The updated UI

# 🏴 Flag 12 – Add an Image

Research how to:

- Create an `assets` folder
- Register assets
- Display an image

Screenshot:

- The steps it took to add an image
- The updated UI
